CAREER OBJECTIVE

A results-oriented software engineer with expertise in developing scalable applications and driving successful product launches. Proficient in cloud technologies, web development, and leveraging data-driven insights to enhance system performance. Passionate about applying innovative solutions to complex technical challenges and contributing to impactful projects.

CORE SKILLS

- Python
- Docker
- AWS
- Machine Learning
- Network skills
- Cloud Computing
- Web Development
- Teamwork
- Communication

- JavaScript
- Kubernetes
- Git
- CCNA
- Linux administrator
- Artificial Intelligence
- Leadership
- Problem-solving

PROJECTS

CCNA Projects

Executed CCNA-related projects under the supervision of a Senior Monitor of Cloud Engineering.

AI Software with RAG for Scalable Workflows

Developed AI software leveraging Retrieval-Augmented Generation (RAG) in Machine Learning to enhance workflow scalability and flexibility.

EDUCATION

Expected Bachelor of Engineering in Communications and Electronics

South Valley National University

Qena, Egypt

August 2024 - June 2029

CERTIFICATIONS

CCNA

Cisco Certified Network Associate

2025-07

EXPERIENCE & INTERNSHIPS

Cloud Architect Engineer

- Developed and deployed scalable web applications, To speed up workflow by collecting data and analysing it in dashboard
- Lead large projects in the successful launch of a new product, ahead of schedule.
- Implemented CI/CD pipelines, reducing deployment time by 30%.
